Verneta, We are scheduled to conduct RAD screening on the northern mound area the week of August 13th. The proposed ramp for Lake Shore Drive will be situated adjacent to LSD in this northern mound area. As detailed in our previous correspondences, we will follow standard screening protocols. We will not be impacting the areas known elevated thorium impacted soils located on the southern mound and other areas on the site. I wanted to let you know in the event you would like to visit the site during our excavation and screening activities. Additionally, the construction of the access road and laydown area is planned for the week of August 20th. Please contact me with any questions regarding the materials we have submitted to you over the last few weeks or if you have any other comments or questions, please call me at 312-307-7293.

Regards, Don
